

KENNEDY
UNIVERSITY

BACHELOR OF SCIENCE IN Cyber SecurityAI

Course Objective

The BSCS (Cyber Security) program is a fast-track, 12-month undergraduate degree that blends academic coursework with practical training to prepare you for careers in cybersecurity. It covers foundational IT and secure computing, network defence, ethical hacking, and advanced topics, along with hands-on labs, real-world case studies, and a 6-month industry internship. Students can choose a specialisation in Advanced Penetration Testing or Digital Forensics and gain both technical skills and professional readiness for roles like SOC Analyst, Network Security Engineer, and Penetration Tester, backed by an accredited degree from Kennedy University and industry-aligned training at eHack Academy.

Course Syllabus

Module 01

Foundations of IT & Secure Computing -

What you'll learn:

- P|ITFP^{AI} – Professional IT Fundamentals Program - Hardware, OS, Networks & Servers
- P|SCSP^{AI} – Professional Secure Computer Systems Program - Security foundations and secure computing practices
- Basic Soft Skills & Career Foundations - Communication, teamwork, and career readiness

Assessment: Internal Assessments, Practical Labs, Assignments & Quizzes, Soft Skills Evaluation

Module 02

Network Defense & Cyber Offense -

What you'll learn:

- P|NDP^{AI} – Professional Network Defense Program - Network security and defense strategies
- P|EHCOP^{AI} – Professional Ethical Hacking & Cyber Offense Program - Ethical hacking and penetration testing
- Applied Cyber Labs & Case Studies - Hands-on practical cybersecurity scenarios

Assessment: Lab Evaluations, Practical Assignments, Scenario-Based Testing, Continuous Assessment

Module 03

Specialisation, Internship & Professional Readiness -

What you'll learn:

- P|APTP^{AI} – Professional Advanced Penetration Testing Program - Specialisation Option A
- P|DFIP^{AI} – Professional Digital Forensics & Investigation Program - Specialisation Option B (Choose One)
- Advanced Soft Skills & Employability - Leadership, interviews, and professional growth
- Internship / Industrial Project - 6 Months hands-on industry experience

Assessment: Internship Supervisor Evaluation, Project Report, Final Presentation, Viva Voce
