

KENNEDY
UNIVERSITY

MASTER OF SCIENCE IN Cyber Security^{AI}

Course Objective

The MSCS (Master of Science in Cyber Security) is a globally accredited, 12-month postgraduate degree that blends academic study with practical cybersecurity training to prepare you for advanced roles in the field. The program covers core areas such as security operations, cloud security, SOC (Security Operations Center) practices, leadership in cybersecurity, and research, combining theory with hands-on AI-enhanced labs, real-world simulations, and industry insights. Graduates earn an internationally recognized master's degree backed by Kennedy University along with practical skills and career support aimed at high-demand cybersecurity roles.

Earn 3 Global Certifications

Course Syllabus

Module 01

Advanced Cyber Defense, SOC Operations & Cyber Offense -

What you'll learn:

- P|SCSPA^{AI} – Professional Secure Computer Systems Program (Advanced Perspective) - Advanced security foundations and secure computing practices
- P|NDPA^{AI} – Professional Network Defense Program (Advanced Level) - Advanced network security and defense strategies
- P|SOCAPA^{AI} – Professional Security Operations Center Analyst Program - SOC operations, threat monitoring, and incident response
- P|EHCOPA^{AI} – Professional Ethical Hacking & Cyber Offense Program - Advanced ethical hacking and offensive security techniques

Assessment: Lab Evaluations, Practical Assignments, Scenario-Based Testing, Continuous Assessment

Module 02

Cloud Security, Specialisation, Research, Internship & Executive Leadership -

What you'll learn:

- P|CSPA^{AI} – Professional Cloud Security Program - Cloud security architecture and best practices
- P|APTP^{AI} – Professional Advanced Penetration Testing Program - Specialisation Option A
- P|DFIPA^{AI} – Professional Digital Forensics & Investigation Program - Specialisation Option B (Choose One)
- Cyber Security Research Methods & Technical Writing - Research methodology and academic writing for cybersecurity
- Internship / Industrial Project / Thesis - 6 Months hands-on industry experience or research thesis
- P|HISO^{AI} – Professional Head Information Security Office - CISO-level strategic security leadership and governance

Assessment: Internship Supervisor Evaluation, Research Paper, Final Presentation, Viva Voce
